5. Integrated Modules

For implementing the trust services in scope, the TSP uses the following already eIDAS-confirmed qualified services provided by module operators as delegated third parties, whereby single certified and not certified operational options of the modules are exactly stated in each related Conformity Certificates for the modules.

A single module can be used by the TSP as *exclusive* or *non-exclusive* service provided by the respective delegated third party (called ‘module provider’).

In case of the *exclusive* service by a module, the TSP shall use the module for the provision of the qualified trust services listed in chap. 4, Table 2 above. Therefore, the present Conformity Certificate covers the operation of the qualified trust services listed in chap. 4, Table 2 above solely using the respective modules.

In case of the *non-exclusive* service by a module, the TSP may operatively decide on the usage or non-usage of the module in the qualified TSP operation. Hence, the present Conformity Certificate for the TSP covers the TSP operation with this service as well as without it.

The table below represents a snapshot at the time of issuance of the present Conformity Certificate. Precise information on the modules of the *non-exclusive* services that are integrated by the TSP at a given time can be obtained from the TSP.
